

Your Safety is our Top Priority

Hear for Life

AUDIOLOGY

At Hear For Life Audiology, your safety starts before you arrive. We have put extra infection control steps in place. We will practice social distancing as well as cleaning of all surfaces.

Other Safety Procedures

We have staged our waiting room to accommodate social distancing or we will have you wait in your car until we are able to see you.

We have extended appointment times to allow more time between patient appointments, which means less time in the waiting room.

We will continue to offer curbside services for cleanings, drop-offs and pick-up of repairs and supplies.

We use a tray system to isolate your hearing aid from others to avoid cross contamination. We do not put your device directly on any surface.

Keeping You Safe

As a medical provider, we will continue to follow strict protocols on the sterilization of equipment. Each day, all equipment is properly cleaned and sterilized and used on only one person. As always, any single-use items such as swabs or inserts are disposed.

Going the Extra Mile

During your appointment, we will use personal protective equipment with all patients. We understand that face masks can be difficult for many of you with hearing loss looking for verbal lip cues or lip-reading. We utilize clear face masks to make it easier to communicate with you. We can utilize speech-to-text apps to make it easier for you to understand us. Choosing our specialized neighborhood audiology office rather than a major medical center will give you less exposure to COVID-19 and other communicable diseases.
