

Online music classes have different rhythm

By Anne Basye

The Gilkey Square tree lighting. Fall and spring concerts. Regional music educator festivals. Christmas wreath sales. Pep band. Maybe Disneyland.

COVID-19 wiped the 2020-21 school music calendar clean, leaving La Conner Director of Bands and Choirs McKenzie Clark and his students to make music on-line.

That is a challenge for an essentially face-to-face endeavor.

When meeting in person, music classes begin with call-and-response warm-up exercises. Clark sings or plays a line; students repeat it. Online, he sings or plays — and does not hear a thing.

“Students are muted because of the lag time between what they hear and their response,” says Clark. Twenty students means “20 different starting points to a song” — a recipe for cacophony. “I can only hope they are singing it back.”

In person, McKenzie can rehearse singers in sections, pulling them back together to polish a piece as an ensemble, often with this reporter at the piano. Tiny, separate squares on a laptop screen do not foster this natural rhythm of rehearsal and feedback, so he is teaching pieces that are sung or played in unison. The high school band has been working on “Cool Blues”, the high school and middle school choirs on “We Shall Overcome” and the “On, La Conner!” fight song.

After Clark teaches a passage, students practice it off-line before submitting a video or audio recording of their work. Through the La Conner school district’s on-line platform, Canvas, “I give them feedback as if I were in person. I tell them, ‘check your key signature’, ‘check your note’ or ‘you played all notes and rhythms right, now make it masterful.’”

Since there is no way to play or sing together, Clark often introduces musical literacy topics like note values and clefs. Sophomore choir member Hadley Shears finds that helpful. So does freshman Sammy Williams, who plays the trumpet.

“It helps me figure out what things mean more than on the surface, that helps me play better,” says Williams. “I am not just playing notes, I understand how the piece works and what it means and why.”

In-person classes team with connection and belonging. “It’s hard to get that right now,” says Clark. “When we meet in person, our most active topic is how to we make music and ourselves sound better. Belonging is an awesome byproduct. Since we can’t sing together now, and we don’t have pep band, I focus on creating that feeling.”

Recently he had students do Show-and-Tell, “a fun silly thing to connect in a different way,” says Shears.

Williams felt that feeling of belonging when he represented La Conner Schools at the Honor Festival sponsored by the San Juan Music Educators Association. This annual event selects top regional music students to rehearse and perform under a guest con-

ductor.

Instead of meeting at Western Washington University, students met on-line with the conductor and a tech assistant. Then, from home, they made two recordings of themselves playing their part — one audio, one video — that will be mixed into one group performance video.

“I love being in a band and this was just like normal band but a whole lot larger than La Conner,” he says. “Seeing all the different instruments and parts, I’m excited to see how it turns out.”

Next semester, middle school band begins. Many sixth graders were just learning their instruments when band was cut short last March. “It will be a challenge to teach sheer beginners on the internet but I’m looking forward to it, and if there are opportunities for in-person classes in the spring we will use them,” says Clark.

As they fine-tune their virtual teaching skills, music educators like Clark are pondering how and when young musicians can perform together safely.

For guidance, they look to best practices emerging from the Aerosol Research Study for the performing arts led by the University of Colorado, which is investigating the effects of COVID-19 aerosol transmission in performance settings.

Studying events like last spring’s Skagit Valley Chorale super-spreader rehearsal have revealed that performing outdoors is safer than indoors; low volume is safer than loud; small groups are safer than large; shorter is better than longer (aerosols quickly accumulate indoors); and social distance is safest. Singers should use specially designed singer’s masks; wind and brass players should use instrument covers.

Whether La Conner musicians can gather in person this spring or next fall, “that first day when we’re back together will be special,” says Clark.

Shears agrees. “Choir is a fun class no matter what format it is, but in person it’s fun to sing as a group because on Zoom we can’t really do that.”

Says Clark, “in the long run, I think kids will be grateful to have had these strange opportunities to invest in themselves as musicians.”

New school superintendent survey

The La Conner School Board has a survey for community input about leadership characteristics and qualities needed in the next District Superintendent. The Board will use the results of this survey in its search process for a new superintendent. Community stakeholders need to respond before March 12, 2021. Go to:

- There is a town in India called Santa Claus.
- Ever wonder how the tradition of leaving hand and footprints in front of Grauman’s Chinese Theater in Hollywood got started? By accident — when silent film actress Norma Ta- madge stepped on wet cement.
- Cellophane, invented in 1908, was originally intended to protect table- cloths from wine spills.
- Those old witch potions aren’t quite as gross as you think: Eye of newt, toe of frog and wool of bat are actually archaic terms for mustard seed, butter- cup and holly leaves.
- Selfies now cause more deaths than shark attacks.

Thought for the Day: “My father always said, ‘Never trust anyone whose TV is bigger than their book- shelf’ — so I make sure I read.” — *Emilia Clarke*

Strange BUT TRUE

By Lucie Winborne

- Pine cones have genders. Male pine cones shed pollen and female pine cones make seeds. When the wind blows pollen into the female cones, the seeds become pollinated.
- Cats are believed to be the only mammals that don’t taste sweetness.
- In 1978, DC put out a “Superman vs. Muhammad Ali” comic book. While the plot deals with hostile aliens, the book’s main highlight is the whooping Superman gets in a sparring match with “The Greatest”!
- The first-ever fashion magazine was sold in Germany in 1586.
- Early cosmetic surgeons used a procedure known as paraffin wax rhinoplasty, in which they would inject hot liquid wax into a patient’s nose and mold it into the desired shape. Not only was this dangerous, but, no surprise, it really didn’t work.
- Canada eats more macaroni and cheese than any other nation in the world.
- A French general, the Marquis de Lafayette, gave John Quincy Adams a pet alligator. Our sixth president not only kept it in a White House bathtub, but enjoyed showing it off to visitors.

AND THE BAND PLAYED ON, BACK IN THE OLD DAYS — Way back in March the La Conner school pep band could pile in a bus, go over the mountains to Spokane and pep up the high school girls basketball team and its many fans in the arena. In La Conner, practices were in a room, together, without face masks. Those were the days, my friends. Stay masked and away from each other to hasten their return

Delay of game: COVID-19 holds up high school sports schedules

By Bill Reynolds

The tipoff to the La Conner High basketball season has been delayed once again.

The reason is the COVID-19 pandemic, which has rebounded this fall: a tenacious, relentless full-court press.

Because of statewide spikes in coronavirus cases, the Washington Interscholastic Activities Association (WIAA) executive board has delayed the start of Season 2, including boys’ and girls’ basketball and wrestling, from Dec. 28 to Feb. 1.

The delay is the latest in a series of high school sports’ schedule changes prompted by the pandemic.

In response to the COVID-19 emergency, the WIAA had realigned its traditional three-season sports schedule (fall, winter and spring) into four shorter seasons. The WIAA, which governs high school sports in Washington state, pushed activities considered at higher risk for COVID-19 exposure later in the school year in hopes the virus would be controlled by then.

The newest adjustment further shortens sports seasons across Washington. State championship tournaments have also been nixed to avoid long distance travel and overnight stays.

“All I know,” La Conner High head girls’ basketball coach Scott Novak told the Weekly News, “is that we are (now) scheduled to begin on Feb. 1 with a seven-week season but I’m sure that can change depending on COVID. That’s all I know at this point.”

The girls placed a program-best second at the 2B Hardwood Classic in Spokane last March, a last major high school sports event held prior to campuses in Washington state being shut down later that month.

Under the new plan, basketball season would conclude March 20 with regional tourney play.

Most traditional fall sports, including volleyball and soccer, are

tentatively set to launch their seasons on March 15.

The La Conner High volleyball team is the two-time defending state 2B title winner. The Lady Braves would have been odds-on favorites this year to complete a state three-peat and capture the La Conner net program’s sixth crown under head coach Suzanne Marble.

Marble, assistant coach Pam Keller and the team are now hoping to salvage a seven-week campaign culminating with regional action May 1.

“At this point,” Marble said, “it’s all so crazy and up in the air.”

The new schedule allows football practices to begin March 8 and extends until Jan. 23 the off-season coaching and workout window that had been in place since late September.

“The window allows for coach-

es in all sports to work with student-athletes in the same fashion as the summer coaching window,” according to a WIAA spokesperson.

Season 3, composed of track and field, baseball, softball, golf and tennis, now runs April 26-June 12.

While the executive board approved the framework for each WIAA season, flexibility remains at the local level due to public health protocols in effect during the pandemic.

“If less than 50 per cent of schools in a classification are able to compete in a sport, in accordance with Department of Health guidelines, the executive board will make an adjustment to the scheduled season in order to allow the chance for greater participation,” a WIAA rep said.
